

We're Creating a Better Way of Eating

At WhiteWave, we're changing the way the world eats for the better®.

Two of the many ways we're making this happen is by staying true to our [Sourcing Principles](#) and sharing our [Supplier Code of Conduct](#).

Our Sourcing Principles emphasize our commitment to:

- Transparency – We believe consumers deserve to know where their food comes from and how the ingredients used to make it are sourced.
- Continuous Improvement – We listen to our consumers so they can help push us to the next level.
- Engaging as Leaders – We engage with stakeholders and experts to create change within our supply chain.

Our Supplier Code of Conduct helps us ensure we partner with suppliers who share our values by asking them to commit to:

- Business Ethics and Compliance – We believe that the quality of our products depends on the integrity of our business.
- Employee and Labor Relations – We are not only focused on protecting the Earth's natural resources, but also all of the individuals throughout the supply chain.
- Environmental Management – We understand that responsibly-produced foods are about more than just health and safety. Our sustainable practices are a part of our DNA and are the cornerstone of our business model.

Two examples of how we've turned our commitment into action include our sourcing of sustainable palm oil and cocoa:

- Sustainable Cocoa – By the end of 2016, all of the cocoa powder in WhiteWave's plant-based, dairy and creamer products within the Americas Foods & Beverages segment will be independently certified as sustainable. This includes Silk, So Delicious, Vega, Horizon Organic and International Delight.
- Sustainable Palm Oil – We source Mass Balance Sustainable Palm oil for our liquid creamer products.

Our commitment to responsible sourcing means that we're always working to improve our practices and produce food as sustainably and ethically as possible, all with an eye toward protecting the Earth's resources for generations to come.
